

Guidance and Service

PRICES ARE THE SAME wherever you buy, through direct mail, yellow pages an acquaintance or online.

Get the guidance and future service that you pay for anyway?

Isn't it good to *know* that when you want to talk monies owed or not owed w/ an insurance co. or a medical provider that you will have someone knowledgeable to help you get your facts together first ?

A significant medical claim will involve 60 + invoices from multiple medical providers and your ins. company.

Potentially, we are talking about 10's if not 100's of thousands of dollars changing hands, you'll want to be clear and in control and together we will make sure that you are.

We are a "non – captive" agency. This means we are free to represent the companies / products that serve our clients in the most effective manner possible. Currently appointed with 14 leading carriers, we have access to all products of quality.

Our website exists so that potential clients may witness the level of excellence that we strive for as well as the continued support that we have earned and greatly appreciate.

Let's get together on the phone and discuss? No obligations or expectations. If you are in the market, we *can* assist you in acquiring the most value for your health insurance dollar possible. Now ... and in the future.

Sincerely,

Joe Jessome
