

Ineligible Health Conditions **Why Procrastinate?**

Below is a **partial** list of medical conditions that will make a person unable to acquire coverage.

Let's face it; we can't decide *which* medical treatments we will require or *when* we will require them.

A

- Achalasia (cardio spasm)
- Acromegaly
- Addison's disease
- Adrenal disorders
- AIDS, ARC, or HIV
- Alcohol dependence or abuse – consider after 10 years of recovery
- Alport's syndrome
- Alzheimer's disease
- Amyloidosis
- Amyotrophic lateral sclerosis (ALS or Lou Gehrig's disease)
- Anemia – aplastic Cooley's, B-12 deficiency, hemolytic, Mediterranean, pernicious, sickle cell
- Anencephaly
- Aneurysm
- Angina
- Angioplasty
- Ankylosing spondylitis
- Anticoagulant therapy
- Aortic arch arteritis
- Aortic insufficiency/stenosis/regurgitation
- Aortitis
- Arnold-Chiari malformation
- Arterial embolism (clot)
- Arterial occlusion
- Arteriosclerosis, atherosclerosis
- Arteriosclerosis obliterans (ASO)
- Arteriovenous malformation (A-V malformation)
- Arteritis
- Artificial heart valve
- Asperger's syndrome
- Ascites
- Ataxia telangiectasia
- Atherosclerosis obliterans
- Atherosclerosis thrombotic disease
- Atrial fibrillation
- Atrial septal defect - present or if surgically corrected with complications
- Autism

B

- Banti's syndrome
- Berger's disease
- Biliary cirrhosis
- Bipolar disorders
- Bladder entropy – symptomatic
- Blastomycosis
- Brachial plexus disorder
- Brain attack
- Bright's disease
- Bronchiectasis
- Bronchiolectasis
- Buerger's disease (thromboangiitis obliterans)
- Burkitt's lymphoma (malignant lymphoma)
- Bypass surgery

C

- Cachexia
- Cancer (with lymph node involvement or metastasis)
- Cardiac decompensation
- Cardiac defibrillator (implantable)
- Cardiomegaly
- Cardiomyopathy
- Central serous retinopathy
- Cerebral palsy
- Cerebrovascular accident
- Cerebrovascular disease
- Charcot-Marie-Tooth disease (if present)
- Chediak Higashi syndrome
- Childhood and adolescent emotional disorders
- Christmas disease
- Chromosomal abnormalities
- Chronic granulomatous disease
- Chronic glomerulonephritis
- Chronic hepatitis
- Chronic obstructive pulmonary disease (COPD)
- Cirrhosis of the liver
- Coarctation of the aorta
- Cocaine abuse
- Colitis (ulcerative)

- Collagen diseases
- Congenital heart anomalies
- Congenital lymphedema
- Congestive heart failure (CHF)
- Connective tissue disorder
- Cor pulmonale
- Coronary artery bypass surgery
- Coronary artery disease (CAD)
- Coronary heart disease (CHD)
- CREST syndrome
- Creutzfeldt-Jakob disease
- Crohn's disease
- Curvature of the spine with pulmonary, cardiac or spinal cord involvement
- Cushing syndrome
- Cystic fibrosis
- Cystic kidney disease
- Cystic medial necrosis

D

- Dejerine type sclerosis
- Delirium
- Delusions
- Dementia
- Demyelinating diseases
- Depressant addiction (current history of addiction with current usage)
- Dermatitis herpetiformis (with evidence of significant immunologic compromise)
- Dermatomyositis
- Depression – major (if hospitalization required)
- DiGeorge syndrome
- Diabetes insipidus
- Diabetes mellitus (type 1 and type 2)
- Disorders of autonomic nervous system
- Down syndrome
- Drug dependence or abuse
- Drug psychosis
